There are many reasons why over a million of our doors are in homes just like yours. Our Feather River Fiberglass Door System is a marriage of low maintenance fiberglass with timeless warmth of woodgrain patterns. Add our handcrafted glass and it becomes a piece of art. Our doors are superior in craftsmanship, security, style and functionality. Count on a warm welcome every time you open your Feather River door and step into your home.

WHY FIBERGLASS?

When it comes to the environment and your comfort, there is no greater material available than fiberglass. Fiberglass has all of the advantages of wood: a warm, rich look and timeless appeal without the rotting, rusting or denting. Fiberglass is also more energy efficient than wood. Our Feather River Fiberglass Door System will protect you from the elements year-round, all while looking beautiful for years to come.

FIBERGLASS DOORS

ADVANTAGES

- More value per dollar spent
- Lowest maintenance
- Resists dents and scratches
- Won't rot, rust or deteriorate over time
- Unique woodgrain detail or smooth look
- Can be stained or painted
- Warm feel and touch
- Energy efficient
- Five times the insulation value of wood
- Highly secure

LIMITATIONS

- None

STEEL DOORS

- Less expensive
- Lower maintenance
- No cracking/warping
- Energy efficient
- Good insulation value
- Secure

- Easily dents
- Scratches lead to rust
- Paint chipping common
- Conducts temperature (cold/hot to touch)

WOOD DOORS

- Beautiful woodgrain
- "High end" aesthetic
- Scratches easily repaired
- Warm feel and touch

- Expensive
- Absorbs moisture
- Can peel/bubble
- Likely to warp and fade over time
- Not energy efficient
- Requires regular maintenance

WHY FEATHER RIVER FIBERGLASS?

Our standard product features are usually found as upgrade options with other doors.

CURB APPEAL

HIGH DEFINITION PANEL EMBOSSMENTS

Authentic panel/embossment design along with unique woodgrain detail give our doors a "true" wood door look with the performance of fiberglass.

MATCHING GLASS CAMING, SILL & HINGE FINISH

Enhanced Look and Appearance.

TRUE RESEMBLANCE OF A REAL WOOD DOOR

Teak, Mahogany and Oak Woodgrain:

Unique Detail in Every Design.

Smooth:

Crisp Design and Paintable to Match any Decor.

LITE FRAME AND STILE ALIGNMENTS (MOST MODELS)

Architecturally Correct Design.

SECURITY

16" WOOD LOCKBLOCK & JAMB SECURITY PLATE
Resists Forced Entry.
Strengthens Lockset and Deadbolt Area.

16" Wood Lockblock

LAMINATED VENEER LUMBER (LVL) DOOR STILES

LVL Stiles provide structural integrity and strength to the door while composite stiles/ rails provide protection against water and insect damage.

LVL Stiles with Composite Edge

MOLDED OPEN PANEL

DESIGN FOR GLASS INSERTS

Adds Structural Performance to door along with perfect fit for glass inserts, plus "Greener" for our environment by limiting/ reducing landfill waste.

Molded in Lite Opening

SAFETY TEMPERED GLASS

While tempered glass helps provide security in our triple and double pane designs, safety is one of the main benefits along with its strength.

Silverdale® 3/4 Oval Zinc in Medium Oak Style

DURABILITY

FIBERGLASS DOOR PANELS
Won't Dent, Rust, Rot or Crack.

SILL KEY™ SYSTEM (Wood Frames)
Helps prevent jamb rot and water damage.*
Sill Key™ doesn't allow jamb bottom to sit on sub floor or sill where it is susceptible to water damage.
Low Maintenance PVC Jambs are available for maximum protection against rot.

BALL BEARING HINGE
Heavy duty doors are a moving item. Ball Bearing Hinges prevent door sag and hinge wear for longer lasting performance.

COMPOSITE BOTTOM RAIL WITH DOOR SWEEP & COMPOSITE ADJUSTABLE THRESHOLD
Composite system for rot resistance and structural performance. Hi-Dam Composite Adjustable Threshold and Door Sweep limits air and water infiltration.

Fiberglass Door Panel

Sill Key™ System

Ball Bearing Hinge

Composite Bottom Rail with Door Sweep & Composite Adjustable Threshold

ENERGY EFFICIENCY

INJECTED POLYURETHANE FOAM CORE
Up to 5 times more energy efficient than wood.
100% CFC Free (Environmentally Friendly).
Superior Density.

TRIPLE PANE DECORATIVE GLASS
Secured By Our High Performance Lite Frame.

FOAM COMPRESSION WEATHERSTRIP
Helps Seal Out Drafts.

Polyurethane Foam Core

High Performance Lite Frame with Triple Pane Decorative Glass

Feather River proudly offers ENERGY STAR certified door models in all 50 states.

Go to featherriverdoors.com to see additional Energy Ratings Information under "Resources".

INDUSTRY LEADING WARRANTY

An industry leading door deserves an industry leading warranty.

All of our Feather River doors come with a Limited Lifetime Warranty to protect the structural components of the door.

Plus, a 5-Year Finish Warranty on stained doors and a 5-Year Finish Warranty on pre-painted doors protect your door's finish from whatever elements it may weather.

We truly stand by our product, and knowing that we have you covered, you can focus on the enjoyable things in life.

Note: For more detailed warranty information please visit featherriverdoors.com and click on Resources.

DOOR: LIMITED LIFETIME WARRANTY
STAIN FINISH: 5-YEAR WARRANTY
PAINT FINISH: 5-YEAR WARRANTY

5-Year Finish Warranty only effective on purchases after August 1, 2018

*Maximum protection is achieved only when the door system is installed and caulked properly.

FEATHER RIVER JAMB OPTIONS

PRIMED FINGER-JOINTED WOOD JAMB* (Option)

Primed white jambs are ready to paint and require regular maintenance over the life of the door.

Pre-Painted: Available as an option with any Custom pre-painted door. See page 12. Option available for exterior and interior color choice.

Primed White

Available widths:
4-9/16"
5-1/4"
6-9/16"
8-9/16"

SOLID CLEAR PINE JAMB* (Option)

Solid Clear Pine Jamb is a great alternative option for customers looking to stain their jamb to complement one of our woodgrain stain finishes. Ready to Stain or Paint Jamb will require regular maintenance over the life of the door. Available option on all Woodgrain Fiberglass Doors.

Clear Pine

Available widths:
4-9/16"
5-1/4"
6-9/16"

WHITE PVC JAMB SYSTEM (Standard Option)

Standard option on both Woodgrain and Smooth Fiberglass.

Low Maintenance: Will not rot or absorb moisture. Insect resistant.

Energy Efficient: Less heat transfer vs. common frame materials.

Pre-Painted: Available as an option with any pre-painted door. Option available for exterior and interior color choice.

White PVC (Unfinished/Ready to Paint)

Available widths:
4-9/16"
5-1/4"
6-9/16"
8-9/16"

*Both jambs come standard with the Feather River Sill Key™ System.

PRE-COLORED PVC JAMB SYSTEM (Upgrade Option) Available option on Woodgrain Fiberglass. PVC pre-colored jamb system complements our hand stained door's overall door finish, enhancing it's beautiful aesthetics. The jamb system is made of PVC which prevents rot and does not peel, fade or warp. It is easy to maintain as it doesn't require re-finishing or UV protection over time. The PVC pre-colored jamb system is a great component to the Feather River door system in achieving its maximum performance.

Note: Designed to complement the overall door finish; color will not match hand stained finishes perfectly.

Marcello™ Wrought Iron 3/4 Lite Door & Sidelites in Chocolate Mahogany Style with Matching Hand Stained Jamb

HAND STAINED PVC JAMB SYSTEM (Upgrade Option) This is a hand stained woodgrain PVC jamb option that offers full non rot protection and is hand stained to best complement our hand stained door finishes. The hand stain method brings out the elegant woodgrain detail and truly enhances the overall beauty of the entire door system. The stain is protected with a UV polyurethane top coat and will require periodic maintenance similar to the door system.

WOODGRAIN OAK FINISHES

Note: A close up of the door system—jamb on the left and door panel on the right—shown in the images above.

MAHOGANY WOODGRAIN FINISH

Long cherished for its resilience and beauty, Mahogany is considered an exotic wood. Feather River Doors designers traveled to the forests of Belize to find the Mara species, and cast several impressions of its unique grain pattern. As a result, you can enjoy a hand stained door with an authentic look of a rare mahogany species in a more sustainable and environmentally friendly fiberglass material.

Need to match exterior accessories such as house trim or shutters with your Feather River pre-painted door? No problem. The BEHR® paint matching system at The Home Depot can color match the fourteen colors shown above. Just take this brochure to the Paint Department or give the store associate the color name and FRD number that corresponds to the paint color you are trying to match.

Printer and monitor limitations prevent exact color duplication. "BEHR" is a registered trademark of Behr Process Corporation.
Note: Colors shown in the brochure are an approximate representation of the actual color; Actual finished color may vary in tone/shade (darker or lighter) from what is shown in brochure. See an HD Millwork Associate to view actual color chip samples of the product in smooth and oak woodgrain.

EASY SELECT PRE-PAINTED PROGRAM

Our Easy Select Pre-Painted Program offers you 4 colors for a quicker delivery option. All you have to do is choose the color you want.

GLASS TYPES

Feather River decorative glass panels are set apart by their artistry and distinguished craftsmanship. Each piece of glass is individually handled through a multi-step process of hand cutting, polishing and finishing, creating beveled-glass facets like fine crystal. Decorative camings are hand molded into place, accentuating the gentle curves and lines of the design. These individual elements are hand-pieced together into a unique finished statement by our team of artisans and craftsmen. Traditional techniques of crafting art glass produce textures, swirls and sparkling bubbles. These purposeful and unique features are essential to the expressive nature of art glass.

ENERGY STAR

All Feather River Fiberglass Doors are energy efficient and designed to stand up to all seasons so your home stays warm during the winter months and cool during the summer. Imagine the savings from a fiberglass door which is up to five times more energy efficient than a traditional wood door.

Most of our doors are ENERGY STAR certified. The chart beginning below and continuing on page 19 shows a listing of the U-Factor and SHGC (Solar Heat Gain Coefficient) for all of our Exterior Door Products. Certified units must hit the U-Factor, Solar Heat Gain Coefficient in their climate zone, and air leakage listed in the chart to the right. Visit energystar.gov for your area's climate zone detail.

Feather River offers ENERGY STAR certified door models in all 50 states.

Effective: 1/1/2015

Glazing Level	U-Factor ¹	SHGC ²	
Opaque	≤0.17	No Rating	
≤1/2 Lite	≤0.25	≤0.25	
>1/2 Lite	≤0.30	Northern North-Central	≤0.40
		Southern South-Central	≤0.25

Air Leakage for Swinging Doors ≤ 0.5 cfm/ft²
¹ Btu/h.ft².°F ² Fraction of incident solar radiation.

U-Factor: The heat transfer per time per area and per degree of temperature difference. The U-factor multiplied by the interior–exterior temperature difference and by the projected fenestration product area yields the total heat transfer through the fenestration product due to conduction, convection, and long wave infrared radiation. Expressed here in units of Btu/h.ft².°F.

Solar Heat Gain Coefficient (SHGC): The ratio of the solar heat gain entering the space through the fenestration product to the incident solar radiation. Expressed as a value between 0 and 1.

Air Leakage (AL): Measures the rate at which air passes through joints in the window. AL is measured in cubic feet of air passing through one square foot of window area per minute. The lower the AL value, the less air leakage. Most industry standards and building codes require an AL of 0.3 cfm/ft².

ENERGY RATINGS INFORMATION

In some years the government has offered a federal tax credit for energy efficient products that meet or exceed ENERGY STAR performance levels for doors. Please visit irs.gov and energystar.gov for additional information regarding tax credit availability or visit featherriverdoors.com for additional information regarding energy efficiency. Wood jamb ratings shown in energy chart.

See the "Resource" page chart on our website for most current ratings.

AIR-SEAL PET DOORS feature dual pane LEXAN® hard panels with an air gap in-between for maximum energy efficiency and wind resistance. Not to mention the pet door flap's innovative design keeps your Ideal Pet's ears, paws and tails safe and unharmed.

FEATURES:

- Maximum energy efficiency
- Spring-loaded locking slide for one-handed use
- Low maintenance and durability

ORIGINAL PET DOORS feature a sturdy thermoplastic telescoping frame; flexible vinyl flap; a floating sill to insure good closure; and a strong molded ABS lock-out slide to restrict the pet's movements when necessary.

FEATURES:

- Minimum energy efficiency
- Flexible vinyl flap with patented edges that won't warp from use or extreme temperatures
- Floating bottom threshold for perfect seal every time;
- Lock-out slide to keep your Ideal Pet out of mischief when unsupervised

Pet Door Installation: Medium sized pet door is installed approximately 4" from bottom of door slab to bottom of pet door frame. Extra Large and Super Large is approximately 8".

Pet Doors carry a 1-Year Manufacturer Warranty from Ideal Pet Products. For more detailed information visit www.idealpetproducts.com.

Feather River will not be responsible for warranties associated with the pet door product.

ROUGH OPENING, & DOOR SWING & HANDING

ROUGH OPENING INFORMATION

Notice: Listed at right are some of the most common door configurations, with rough opening dimensions. If you find that your rough opening does not match the standard sizes, we have options that help to accommodate almost any rough opening size. Ask your Home Depot associate for more information regarding cut-down and sidelite spreader options.

Doors with Sidelite(s): Rough Opening sizes shown at right are for a standard continuous head and sill setup with primed wood jamb or unfinished PVC jamb. Note: Some PVC Jamb options may add 1/2" per sidelite to the width shown in the chart at right (this will be a continuous head and sill unit, but at a box construction size).

Box Construction Size Option: We also offer our doors in box construction size depending on jamb option. This size adds 1/2" to the measurements shown per sidelite.

Box Construction with Spread Mull Option: Allows for a 1/2" to 3" spread between door and sidelite. Built as standard box construction and only available on certain jamb options.

Double Door with Two Sidelites: Only available in Box Construction as standard and no Spread Mullion.

Outswing Units: Come standard with a Bumper-Style Sill, which requires that you subtract 1-1/8" from the Prehung Unit and rough opening height. Also add 1/2" to Brickmold Opening for width.

Wheelchair Accessible: Subtract 7/8" from any of the heights shown.

Threshold: Inswing Units – Threshold height is 1-3/8", which allows for approximately 1" opening clearance. If a spacer is needed under sill to allow for proper opening clearance, please adjust rough opening accordingly.

Transom: To calculate rough opening height with a transom, add the actual transom height to the brickmold opening height.

Half Round Transom: It is highly recommended to have a professional installer figure rough opening measurement due to total height of entire unit. Additional work may be required to increase the size of the opening for structural performance.

PRE-HUNG SETUP CONSTRUCTION EXAMPLES

DOOR SWING & HANDING

Viewed From The Outside

HOW TO DETERMINE YOUR ROUGH OPENING

- Between the studs, measure width at top, center and bottom of opening.
Record the smallest measurement in the white box.
- From floor up to the bottom of the header, measure height at both sides of the opening.
Record the smallest measurement in the white box.

ROUGH OPENING CHART

	NOMINAL DOOR WIDTH	NOMINAL DOOR HEIGHT	PREHUNG UNIT SIZE	ROUGH OPENING	BRICKMOLD OPENING
